

WORKING WITH SELECTION

Name - **Manas Pratim Biswas**

Roll No - **002011001025**

Procedure

- Open the icons.psd file in the Photoshop
- Using the polygonal lasso to select the star
- After selecting the star click on Layer > new Layer Via Cut
- A new layer gets made save it with the name “star”
- Using the polygonal lasso to select the Golden Box.
- After selection click on Layer > new Layer Via Cut, save as “square”.
- Then select the square layer and using the lasso select the inner hole and make a new layer named inner circle, this makes a hole in the layer “square”
- Same for the polygon, name the layer polygon.
- Select the pen tool and select the curve using it, make a new layer via cut, name it as “curve”
- Select the paint brush , edit the pixel to 9px, and choose the hard brush
- Select the edit mask option and use the paint brush to select the circle and switch to foreground if the masking is present outside the borders of the circle
- Once masking is complete save as a new layer
- Use the magic wand to select the letters “icon” , keep pressing the shift and clicking on the letter
- Once all the icons are selected remove the background by tapping on the eye button on the layers tab.
- Save the file as 025_TASK7.PSD and 025_TASK7.JPG
